Dr Sure

SECOND GENERATION ORGANIC INSECTICIDE

Dr. Sure is a phenomenal breakthrough in organic pest control that overcomes the conventional pesticides. It's a **second generation of organic insecticide** developed by our R & D team for successful control of insects on crops. Dr. Sure is plant origin based insecticide invented with advanced technology to control all type of insects that infest plants. The active molecules with rapid action kill the target insects in short time. An assured eco-friendly solution for insects control.

MODE OF ACTION: Phytochemicals in this formulations kills the insects through ingestion which disrupts insects growth, metamorphosis and reproduction.

TARGET PESTS: Aphids, Jassids, Thrips, Mites, White flies, Red Spider etc.

TARGET CROPS: Can be used on all types of crops including Fruits, Flowers, Vegetables, Grapes, Mango, Pomegranate, Tomato, Capsicum, Brinjal etc.

DOSAGE: Foliar Spray: 2 ml/lit of water

BENEFITS:

- Effective against various insects.
- Can be used on all types of crops.
- Helps to break resistance.
- Purely organic, residue free and safe.

#SOIL- THE MOTHER OF ALL

Amrut **NO NOTS**[™]

ORGANIC NEMATICIDE

No Nots is one of the latest KVAT's innovations for effective control of root knot "Nematodes", an ideal product to be included as a part of IPM. No Nots is a potent synergic plant extracts formulation, which controls plant parasitic nematodes. It can also be used during pre-planting or on established plants. Being completely organic, it is eco-friendly and doesn't harm soil micro-flora.

MODE OF ACTION: Highly developed strong botanicals with fumigation activity designed for soil application. These molecules show lethal action on nematodes from soil and within roots. Results in curing and development of healthy roots and hence the plants.

TARGET CROPS: Chilli, Tomato, Capsicum, Pomegranate , Berries, Citrus, Grapes, Nut trees, Fruit trees, Cole crops, Cucurbit crops, Vegetables, Ornamentals and lawns.

TARGET PESTS: Root Knot nematodes (Meloidogyne incognita), etc.

BENEFITS:

- Controls various crop nematodes from roots and soil as well.
- Fast and effective natural control
- Can be used on all types of crops without any side effects.
- Increases plant immunity.

DOSAGE: Soil Application: 3-4 ml/lit of water

Amrut[™] OUT

SECOND GENERATION ORGANIC FUNGICIDE

Out is Second generation advanced organic fungicide which is highly efficient in terminating a broad variety of phytopathogenic fungi with its unique mode of action, hence the name 'OUT' Organic Unique Terminator.

Amrut OUT is a botanical fungicide produced from the extract of various herbs having fungicidal property. It is purely an organic composition having ability to control various fungal diseases such as Downy Mildew, Rust, Smut etc.

MODE OF ACTION: The strong and distinct botanical molecules present in this fungicide helps to break the resistance of fungal pathogens formed due to excess use of chemical fungicides.

TARGET CROPS: All fungal infected crops
Grapes, Ginger, Banana, Papaya, Tomato, Brinjal, Onion, Capsicum, Vegetables, Horticulture Floral crops etc.

BENEFITS: Fungal resistance to measures curbs down & controls its spread/growth

Useful on Field crops, Horticulture & Fruit crops, Spices & Condiments,
Floriculture and Medicinal plants too Residue free on Standing & Post harvest produce

DOSAGE: Foliar Spray: 2 ml/lit of water

#SOIL- THE MOTHER OF ALL

Amrut **POWDERY FIGHTER**TM

BOTANICAL SOLUTION TO POWDERY MILDEW

It is a biotechnologically invented plant origin based fungicide to control Powdery Mildew and other fungal diseases. It inhibits growth of mycelium and removes fungal parts from the surface of leaves. Increases immunity of plant against harmful powdery mildew and other fungal diseases.

UNIQUE MODE OF ACTION: Components produce oxygen radicals in natural sunlight, ruptures conidia and damages the hyphae within 48 hours after initial treatment. Altered pH slows fungal growth. Acts as physical barrier between leaf surface and fungus.

TARGET CROPS: All crops infected with Powdery mildew such as Grapes, Mango, Tomato, Capsicum, Chilli, Vegetables, Fruits etc.

BENEFITS:
Specially designed to control powdery mildew in grapes as well as vegetables Contains naturally derived plant extracts and proteins.
Has preventive as well as curative property.

DOSAGE: Foliar Spray: 3 ml/lit of water
